This may be proved geometrically and analytically. First, for the geometrical proof, it is enough to prove that when a and b alone vary the relation between the increments is Aada + Bbdb = 0, for then a and g alone varying, the relation between the increments will be Aada--Cgdg = 0 (as to the negative sign it is clear from the figure that a, g will increase or diminish together), and we thence at once infer the general relation. We have consequently to prove that, considering a and b as alone variable, Aada + Bbdb = 0; or, what is the same thing, ada: -bdb = XOZ: YOZ. The points XYZ remain fixed, but 0 moves through the infinitesimal arc 00 , centre Z, which may be considered as situate in the right line OM drawn from 0 at right angles to ZO, and meeting XY produced in the point M. And then writing for a moment LOXY=X, L OYX= Y, L OMY=M, we find at once da= OO Cob X + M), -db=. 00 cos (F-M); ON SOME ELLIPTIC FUNCTION IDENTITIES. By J. W. L. Olaisher. 1. Lemma I.
