RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 24 pages. Original publisher: Washington, DC : U. S. Dept. of Transportation, 1996 OCLC Number: (OCoLC)34885489 Subject: Infrastructure (Economics) -- United States. Excerpt: . . . is more significant than to shorter trips, consistent with a greater opportunity for advantageous diversion. The simulations were performed using an ATIS market penetration level of 5 . A separate simulation study predicted that pretrip information on roadway conditions could result in a delay reduction of 15 when a capacity reducing 33 incident occurs and off-road travel options are present. Studies also indicate interest in traffic information on the part of the traveler as well as willingness to react to avoid congestion and delay. In focus groups for the Atlanta 34 Project, 92 -98 of participants found the Advanced Traveler Information Kiosk current information on accidents, alternate routes, road closures, and traffic congestion to be useful and desirable. A survey in Marin County, California, showed that if regular commuters had been presented with alternate routes including travel time estimates, 69 35 A pilot project in would have diverted and would have saved an average of 17 minutes. . the Netherlands found a...

This pdf may be worth purchasing. This is for anyone who statte there was not a really worth reading. I found out this pdf from my i and dad encouraged this pdf to understand.

-- **Mrs. Annamae Raynor**

If you need to adding benefit, a must buy book. This really is for all who statte that there had not been a well worth reading. It is extremely difficult to leave it before concluding, once you begin to read the book.
