Per. and Pel. , right and left pore canals, aer. and ael. , right and left anterior enterocoeles. oe. , oesophagus. S. , stomach, rpa. and lpa. , posterior arms of the pluteus. series of preserved material representing the various stages from the egg to the adult form. The larvae were reared and preserved during the Summers of 1900 and 1901, in the U. S. Fish Commission Laboratory at Beaufort, N. C, while the detailed study of the material has been carried on in the Zoological Laboratory at the Johns Hopkins University. A Muscular Apparatus of the Pluteus. When the plutei were swimming undisturbed in an aquarium it was noticed that the four long posterior arms which join the body of the larva near its middle, would occasionally be quickly spread far apart at the top then more slowly resume their normal position....
